Species: **Tyrannosaurus Rex**

Tyrannosaurus' bite force is over ten times that of an adult aligator, or roughly 8,000 pounds of pressure.

Species: **Carnotaurus**

The horns above the eyes of the Carnotaurus are not weapons, but social displays the dinosaurs use to identify each other.

Species: **Brachiosaurus**

Brachiosaurus is able to reach its neck over 30 feet above ground, allowing it to feed on levels of foliage other dinosaurs can't reach.

Species: **Apatosaurus**

Confident in its size as one of the largest animals to walk the Earth, Apatosaurus is a gentle giant.
